About ABENA	42

FSC™ (Forest Stewardship Council) is an international non-governmental organization dedicated to the promotion of responsible forest management worldwide. FSC™-certified products are made from raw materials from well-managed forests and responsible sources. The label's traceability and integrity are upheld through stringent control measures, and by choosing FSC™-certified products, you help take care of forests and the people and wildlife that call them home. Visit www.fsc.org.

Do you want to focus on sustainability? We can help you get started

With an increased focus on the limited natural resources on earth and the CO_2-emissions, it has never been more relevant to act sustainably.

To us, sustainability means a clear focus on high quality, our shared social responsibility, and the environment.

It is about us making active and sensible choices throughout the process - from the purchase of raw materials until the products and interior is delivered to you.

However, as a concept, sustainability does not necessarily

mean the same for your business, as it does for us. Sustainability is versatile and allows each individual to focus on different environmentally friendly initiatives.

So, what do your sustainable ambitions look like?

The answer to this can vary from person to person - from company to company - and sometimes it is challenging to put into words how you want to fulfil your company's sustainable vision.

We are happy to help you on your way.

At ABENA, sustainability embraces all activities aimed at:

- Circular economy
- Optimization of recycling
- Reduction of CO_2-emissions
- Reduction of consumption - including paper
- Eco-labels and certifications

Every day we live and breathe to create a sustainable everyday life in close cooperation with our customers

and suppliers. Therefore, we aim to think sustainability into our production and assortments in every possible aspect.

We will present all the options you can choose for your washroom facilities, that protect the environment as much as possible.

Of course, it is your choice – we just want you to know that you always have the opportunity to choose a sustainable solution tailored to your needs.

We look forward to guiding you.

At ABENA, we are experts in hygiene paper

In our range you will always find a product that satisfies your needs – whether you focus on quality, price or sustainability. On our shelves, you will find a number of different brands placed alongside ABENA's own, Care-Ness brand.

Let the colours of Care-Ness guide your choice

The paper range in Care-Ness includes three different ranges:

Excellent, Classic and Nature cover a variety of needs and contain both hygiene paper for your hands and toilet paper.

Excellent

- You get the absolute highest paper quality.
- You get a paper range made of new fibre.
- You get our best quality in terms of absorbency, strength and comfort.
- You get a paper range that complies with the high demands of your guests for hygiene paper and where quality plays a crucial role in your choice.

Classic

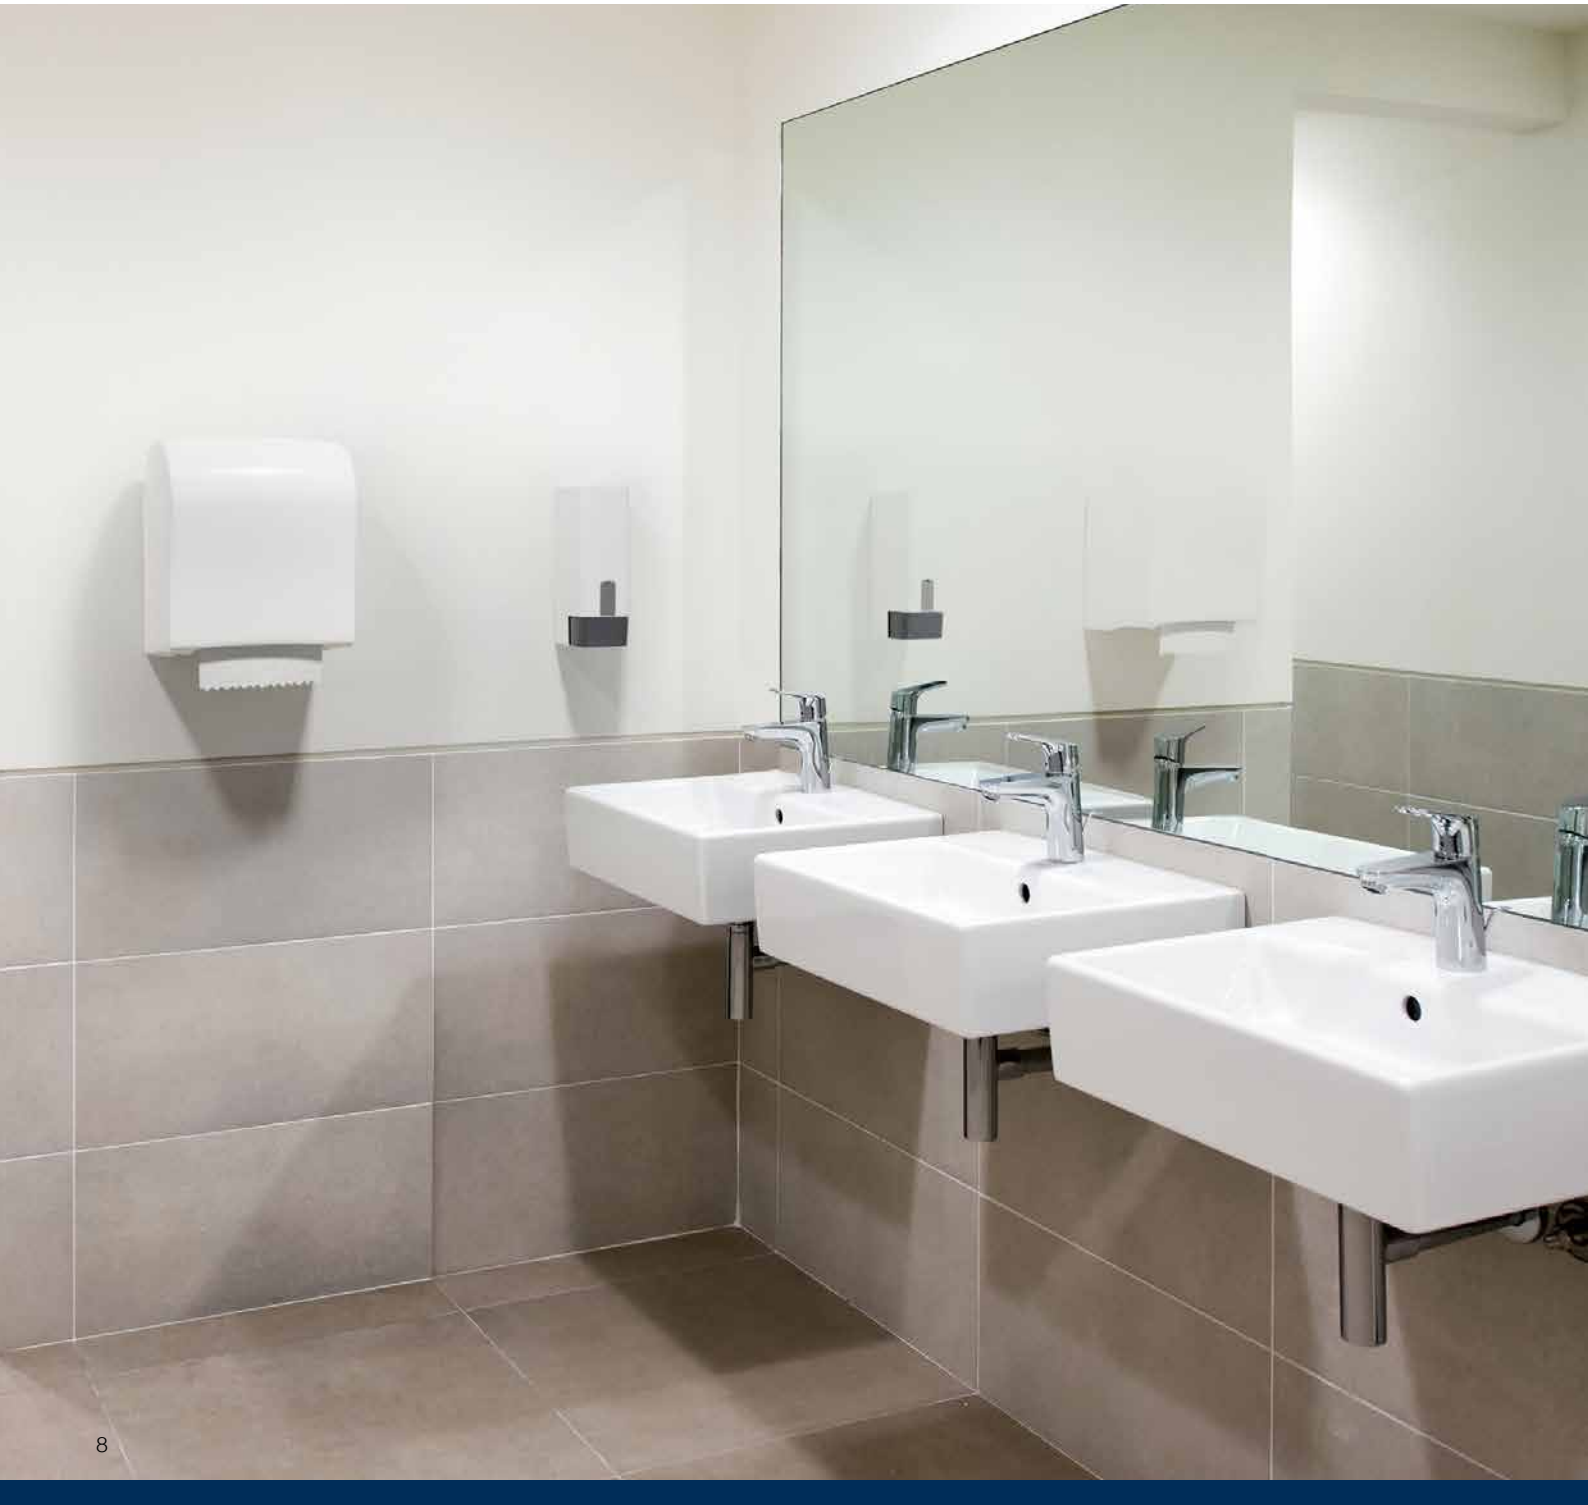
- You get a paper quality with many good properties.
- You get a paper range made of mixed fibre or from recycled paper in a very high quality.
- You get a white paper with a good absorption capacity that feels soft and comfortable.
- You get a paper range suitable for washrooms with a high consumption due to high frequency of toilet visits.

Nature

- You get a good paper quality.
- You get a paper range that lightens up grey recycling.
- You get a recycling paper range that meets the need for wiping, where comfort is not the first priority.
- You get a recycling paper range that meets the guest's basic needs – and which meets the economic aspect that plays a crucial role in your choice of paper.

Find the solution that reflects your needs

When you choose a solution for your washroom facilities with hygiene paper for hands, toilet paper, dispensers and waste bins, we recommend having in mind how many people will use the facilities and what expectations your guests may have.



As a help, it is a good idea to consider:

1. How many guests use the washroom facilities?
2. Which expectations do your guests have for the facilities?
3. Do they have special requirements for paper quality?
4. How often do they wash their hands? Consider paper consumption.
5. Which feeling do you want to convey to your guests through your choice of hygiene paper and interior?

Our certified paper ranges and qualities help you choose environmentally friendly products

What does the Nordic Swan Ecolabel tell you?

The Nordic Swan is the Nordic ecolabel, which guarantees that special attention has been paid to environment, climate, quality and sustainability in all steps from raw material processing to production, use and disposal. Each product meets specific requirements and has its own license number.

Paper series and qualities that are Nordic swan ecolabelled, help you choose the most environmentally friendly products on the market.

What does the FSC®-certification tell you?

The FSC®-certification testifies that all the wood species used in the production of paper are sustainably cultivated and felled and have been properly sourced from managed forests.

However, the certification also shows that we work actively together to ensure that people living in the forests do not suffer any harm. At the same time, we ensure that forests have always fertile ground for propagation. Therefore, we do not cut down trees without also planting new ones.

What do we communicate with our EU Ecolabel certification?

Through the flower, the EU Ecolabel certification tells you that all process, around the production of paper are as environmentally friendly as possible.

With our Ecolabel certification we also promise that the processes that take place before the raw materials arrive at the production and until the finished paper leaves us, are conducted with care for the environment.

What should you know about your paper?

When choosing the right paper solution, there are many factors to consider.

While we carry many different kinds of paper products, all paper products in our assortment can be sorted into two general types: New paper made from virgin fibers, and paper made from recycled fibers and material. While the two certainly share many common traits, there are also differences.

We have tried to answer some of the most relevant questions, so you can evaluate what is most important to you, before you choose your paper solution.

Is recycled paper as absorbent as paper made of virgin fibers?

No. Virgin fibers are longer, making them more absorbent and stronger. When paper is recycled, the fibers are cut shorter during the process, reducing their absorbency. Longer fibers also increases solubility in toilet paper.

Is recycled paper as soft as paper made of virgin fibers?

The answer to this question is subjective; In theory, the longer fibers in virgin paper should be softer, but some people feel that recycled paper is just as soft, if not softer.

Can recycled paper also hold certifications?

Yes, recycled paper can also be FSC™-certified, certified with the Nordic Swan Ecolabel etc. But since it is more difficult to prove the exact origins of the material used in the process, it can be more difficult to achieve certain certifications for recycled paper. In many ways, it is easier to achieve certifications for paper made of virgin fibers, since there is no doubt concerning the origins of the raw materials. Therefore, you will find that a larger percentage of our virgin-fiber products have certifications, compared to our recycled products.

Is the paper bleached using chemicals?

Virgin fibers/cellulose are white, and as such do not need to be bleached, however, sometimes the glue used to bind the fibers together is bleached to maintain the clean, white color. Recycled paper can be both – unbleached recycled paper will be more brown in color, while bleached recycled paper will look similar to paper made of virgin fibers. The chemicals used for both types of paper are increasingly safe, clean and more environmentally friendly than before, as producers are also becoming more aware of the need to protect the environment.

Is recycled paper better for the environment than paper made from virgin fibers?

Unfortunately, there is no definitive answer to that question. While recycled paper might seem better and more environmentally friendly, it can be difficult to determine what the precise origins of the recycled material is. On the other hand, it is important to reuse materials, that have already been produced and processed.

With paper made from virgin fibers, it is much easier to trace the path of the raw materials, and certifications such as the FSC™ guarantees that the raw material comes from responsibly managed forests, but no matter what, it is still a brand new product being made.

Ultimately, the decision is yours. What is most important to you?

ABENA's Classic Recycled dispenser range

From plastic waste to new and stylish dispensers.

Plastic waste has many qualities that deserve a new life! A new life you help create when choosing a Classic Recycled dispenser solution from ABENA.

Our Classic Recycled dispensers are made from 100% recycled plastic from electrical and electronic waste (WEEE) such as televisions, washing machines, PCs and printers.

The plastic residues from the equipment are sorted out and granulated in order to be used in the manufacturing of the dispensers.

This way, we help promote a circular economy for the benefit of both people and the environment.

ABENA Care-Ness Excellent Eco

ABENA Care-Ness Excellent Eco originates from our Excellent range. By choosing Abena Care-Ness Excellent Eco you get a hygiene paper solution that originates from a 100% CO_2-neutral production and which helps you reduce the environmental footprint of your business.

Abena Care-Ness Excellent Eco offers you a sustainable alternative

Environmental concerns are clearly reflected in the choices we all make. And in sustainable production, it is simply about saving energy and using the right energy.

In the CO_2-neutral production of ABENA Care-Ness Excellent Eco, the environment is spared from the gradual degradation that is a reality when companies use fossil fuels such as oil and gas.

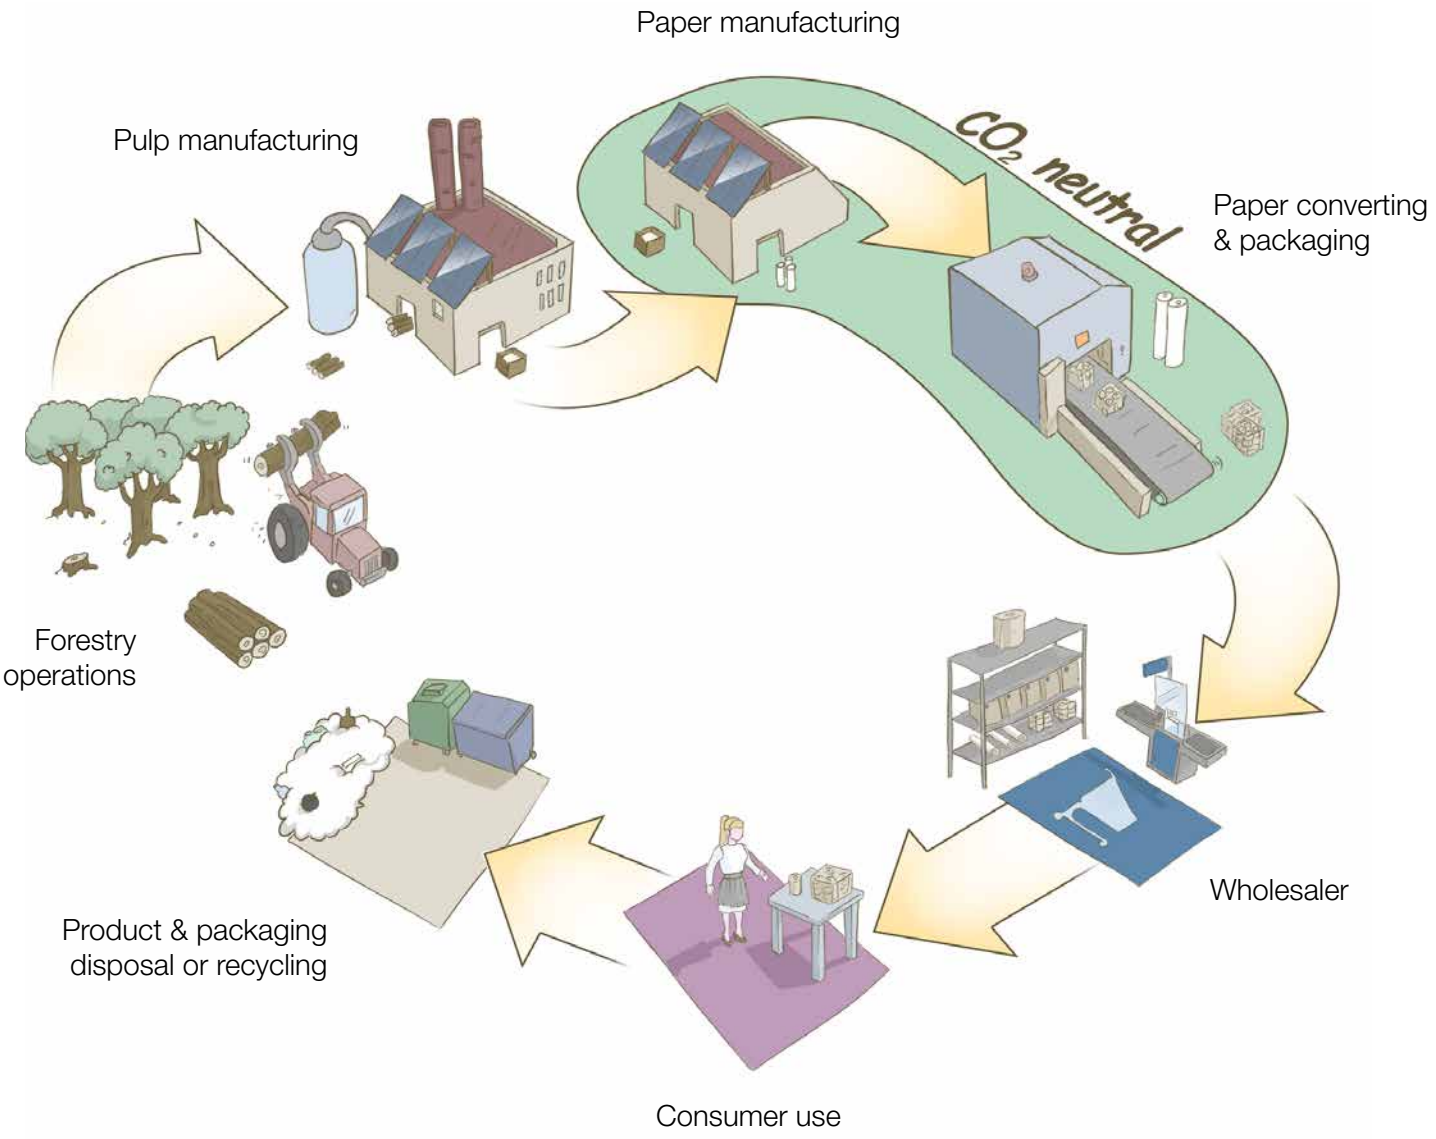
However, CO_2-neutral production embraces a number of different responsible initiatives, and in the production of ABENA Care-Ness Excellent Eco, it is a priority to use both solar energy and incineration of sustainable biomass as an energy source.

For the benefit of both people and the environment.

When choosing ABENA Care-Ness Excellent Eco, you get a solution in hygiene paper, which:

- is free from plastic packaging.
- is from a 100% CO_2-neutral production, in accordance with ISO 14067.
- is produced with 100% renewable energy.
- is made from traceable new fibre paper from certified forests.
- shows that you and your guests prefer environmentally friendly hygiene paper without compromising on quality.

The supply chain of ABENA Care-Ness Excellent Eco



The majority of CO_2-emissions in all paper productions are related to energy consumption, no matter which kind of paper you choose. This is why ABENA has chosen to take action by working with a partner who is on a sustainable path, creating a 100% carbon-neutral production.

The following pages give you an insight into the paper types that our ABENA Care-Ness Excellent Eco-range embraces. Here we also present to you a selection of waste bins and dispensers complementing both hygiene paper for the hands and toilet paper in the best way possible.

You will thus be introduced to an environmentally friendly range, which puts sustainability first without compromising our quality.

ABENA Care-Ness Excellent Eco

Hand towel roll, ABENA Care-Ness Excellent Eco

Item number	Color	Ingredients / Composition	Dimensions	Layer quantity	Roll per cll / cll per pll
1999905913	White	100% Cellulose	213m x 20.3cm, Ø19.5cm	1 layer	6 / 32

ABENA Care-Ness Excellent Eco is a series of sustainable paper products produced 100% CO2 neutrally, but still in the same high quality as the other products in the Excellent series. The product is produced CO2 neutrally according to ISO standard 14067. This towel roll is also the hygienic alternative to fabric towels and fan heaters. The product is made from 100% Cellulose, which combines with the smooth surface and unique embossing to provide maximum absorbency and reduce consumption. The sheets are folded with one-sheet-at-a-time function, which both reduces consumption and improves hygiene. FSC™ (Forest Stewardship Council) and EU Ecolabel certified.

Dispenser, Classic Recycled

Item number	Color	Dimensions	Material	Features	Pcs per cll / cll per pll
1999902757	White	20x30x34cm, Ø35cm	Plastic	Hand towel roll	1 / 36
1999902633	Black	20x30x34cm, Ø35cm	Plastic	Hand towel roll	1 / 36

The dispenser is made of 100% recycled plastic, and has a strong and long-lasting quality. Stylish design with smooth edges for an inviting experience. The tear-off edge of the dispenser is designed so that the user does not cut his or her hands when pulling out the paper. The dispenser is designed so that service staff can easily keep an eye on how much has been used without opening it.

Hand towel, ABENA Care-Ness Excellent Eco

Item number	Color	Ingredients / Composition	Dimensions	Layer quantity	Folding method	Sheet per pk / pk per cll
1999905916	White	100% Cellulose	22x21cm	2 layers	V-fold	200 / 20

ABENA Care-Ness Excellent Eco is a series of sustainable paper products produced 100% CO2 neutrally, but still in the same high quality as the other products in the Excellent series. The product is produced CO2 neutrally according to ISO standard 14067. This towel sheet is the hygienic alternative to fabric towels and fan heaters. The product is made from 100% Cellulose, which combines with the smooth surface and unique embossing to provide maximum absorbency and reduce consumption. The sheets are folded with one-sheet-at-a-time function, which both reduces consumption and improves hygiene. FSC™ (Forest Stewardship Council) and EU Ecolabel certified.

Dispenser, Classic Recycled

Item number	Material	Features	Size	Dimensions	Color	Pcs per cll / cll per pll
1999902634	Plastic	For all types of paper towels	Mini	13x30.5x26cm	Black	1 / 80

1999902758	Plastic	For all types of paper towels	Midi	12.5x31x39cm	White	1 / 40
1999902635	Plastic	For all types of paper towels	Midi	12.5x31x39cm	Black	1 / 40

The dispenser is made of 100% recycled plastic, and has a strong and long-lasting quality. Stylish design with smooth edges for an inviting experience. The dispenser is designed so that service staff can easily keep an eye on how much has been used without opening it.

ABENA Care-Ness Excellent Eco

Jumbo roll, ABENA Care-Ness Excellent Eco

Item number	Color	Ingredients / Composition	Size	Dimensions	Layer quantity	Roll per cll / cll per pll
1999905915	White	100% Cellulose	Mini	190m x 9.5cm, Ø19.5cm	2 layers	12 / 32

ABENA Care-Ness Excellent Eco is a series of sustainable paper products produced 100% CO2 neutrally, but still in the same high quality as the other products in the Excellent series. The product is produced CO2 neutrally according to ISO standard 14067. This roller is suitable for places that strive to give users the best experience. The product is made from 100% Cellulose. Together with the unique embossing, this provides maximum absorbency and softness. FSC™ (Forest Stewardship Council) and EU Ecolabel certified.

Dispenser, Classic Recycled

Item number	Material	Features	Size	Dimensions	Color	Pcs per cll / cll per pll
1999902766	Plastic	For mini jumbo rolls	Mini	12x26x26cm, Ø20cm	White	1 / 96
1999902638	Plastic	For mini jumbo rolls	Mini	12x26x26cm, Ø20cm	Black	1 / 96

The dispenser is made of 100% recycled plastic, and has a strong and long-lasting quality. Stylish design with smooth edges for an inviting experience. The tear-off edge of the dispenser is designed so that the user does not cut his or her hands when pulling out the paper. The dispenser is designed so that service staff can easily keep an eye on how much has been used without opening it.

Jumbo roll, ABENA Care-Ness Excellent Eco

Item number	Color	Ingredients / Composition	Size	Dimensions	Layer quantity	Roll per cll / cll per pll
1999905914	White	100% Cellulose	Midi	320m x 9.5cm, Ø24cm	2 layers	8 / 16

ABENA Care-Ness Excellent Eco is a series of sustainable paper products produced 100% CO2 neutrally, but still in the same high quality as the other products in the Excellent series. The product is produced CO2 neutrally according to the ISO standard 14067. This jumbo toilet roll is made of 100% new fiber. The paper's unique embossing makes the product soft and provides maximum absorbency. An environmentally friendly, high-quality product perfect for areas where a large amount of toilet paper is used in a short time. FSC™ (Forest Stewardship Council) and EU Ecolabel certified.

Dispenser, Classic Recycled

Item number	Material	Features	Size	Dimensions	Color	Pcs per cll / cll per pll
1999902773	Plastic	For midi jumbo rolls	Midi	12x34x36cm, Ø33.5cm	White	1 / 54
1999902639	Plastic	For midi jumbo rolls	Midi	12x34x36cm, Ø33.5cm	Black	1 / 54

The dispenser is made of 100% recycled plastic, and has a strong and long-lasting quality. Stylish design with smooth edges for an inviting experience. The tear-off edge of the dispenser is designed so that the user does not cut his or her hands when pulling out the paper. The dispenser is designed so that service staff can easily keep an eye on how much has been used without opening it.

ABENA Care-Ness Excellent Eco

Toilet paper, ABENA Care-Ness Excellent Eco

Item number	Color	Ingredients / Composition	Dimensions	Layer quantity	Roll per cll / cll per pll
1999905912	White	100% Cellulose	33.75m x 9.5cm, Ø11.4cm	2 layers	48 / 14

ABENA Care-Ness Excellent Eco is a series of sustainable paper products produced 100% CO2 neutrally, but still in the same high quality as the other products in the Excellent series. The product is produced CO2 neutrally according to ISO standard 14067. The product is also made of 100% new fiber, which together with the unique embossing provides maximum absorbency and softness. FSC™ (Forest Stewardship Council) and EU Ecolabel certified.

Mild Cream Soap, ABENA

Item number	Features	Volume, net	pH value	Pcs per cll / cll per pll
1999903971	Colorant- and fragrance-free	1000 ml	PH 4-5	6 / 95

ABENA Mild Cream Soap is particularly suitable for daily hand washing.
The pH value of the soap is adjusted to match the pH of the skin. This makes the product versatile and suitable for frequent use.

The product does not contain colorant or fragrance.

This product should only be used externally on the body. Avoid contact with eyes.

Hand Disinfectant Gel, ABENA

Item number	Features	Volume, net	pH value (conc.)	Pcs per cll / cll per pll
1999904101	Refill, pouch for dispenser	1000 ml	PH 6-7	6 / 95

Our hands are the main source of infection. Frequent hand disinfection is a way to prevent the spread of infection when there is a risk of transferring bacteria and viruses. ABENA hand disinfectant products contain 85% alcohol and glycerin, which have a documented lethal effect and prevent the spread of infection.

Dispenser, Classic Recycled

Item number	Color	Dimensions	Material	Features	Pcs per cll / cll per pll
1999902776	White	11.2x10x27.5cm	Plastic	For refills of liquid soaps and disinfection	1 / 260
1999902655	Black	11.2x10x27.5cm	Plastic	For refills of liquid soaps and disinfection	1 / 260

The dispenser is made of 100% recycled plastic, and has a strong and long-lasting quality. Stylish design with smooth edges for an inviting experience. The dispenser is designed so that service staff can easily keep an eye on how much has been used without opening it. This dispenser is also for refills of liquid soaps and disinfection.

ABENA Care-Ness Excellent Eco

BrickBin

Item number	Color	Volume, gross	Material	Dimensions	Pcs per cll / cll per pll
1999905105	Black	65 l	HDPE	35x35x70cm	1 / 18
1999905104	White	65 l	HDPE	35x35x70cm	1 / 18

Trash can 23 liters, Lucart EcoNatural

Item number	Color	Volume, gross	Features	Material	Dimensions	Pcs per cll / cll per pll
1000009726	Black	23 l	Prepared for wall mounting	AlPe	215x330x500mm	1 / 44

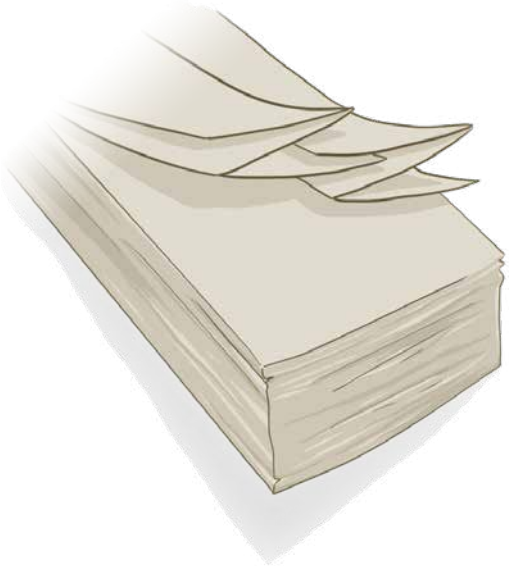
The trash can is made from recycled milk cartons with care for the environment. The material is in a robust and timeless design, and the trash can be hung on the wall, and has a top that hides the bag.

Choose the type of hygiene paper folding that suits you best

When buying ABENA hygiene paper in sheets, it is important that you decide how you want the paper folded. The folding size of the paper sheet is also important for your choice of dispenser.

The width and depth of the sheet and dispenser respectively determine which paper solution is chosen.

For us, it is important that you choose both the type of paper sheet, the paper quality and the folding that suits your needs best. The illustrations give you an insight into each folding and what it means for your consumption of paper and for your hygiene.



Z-fold

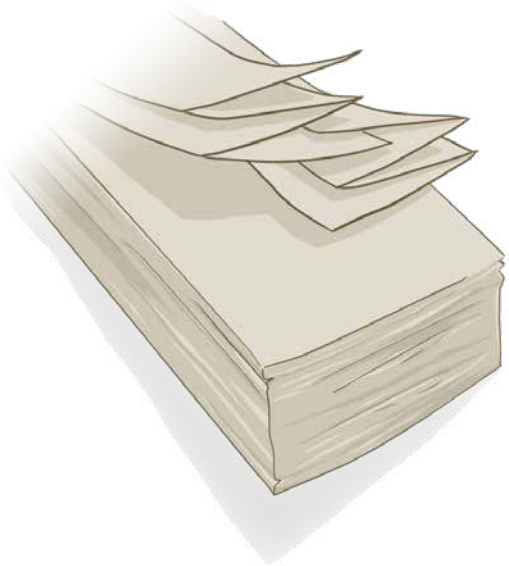
Z-fold gives you three panels, and when you pull a towel sheet from the dispenser, part of the next sheet will follow. This type of folding ensures that you draw only one sheet of paper at a time, while avoiding contact with the next sheet.

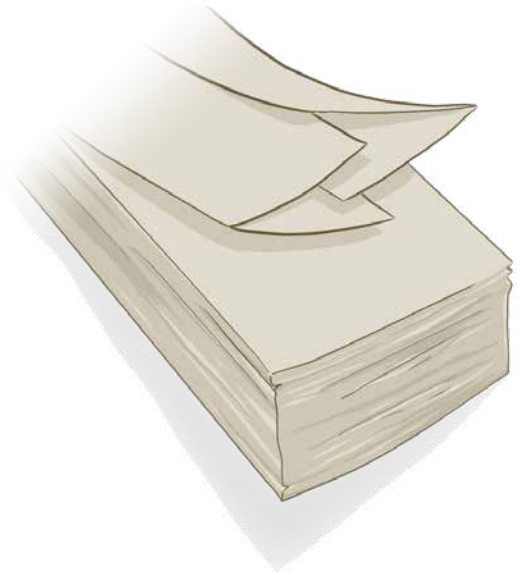
This type of folding typically makes you more aware of your paper consumption because you actively pull out each sheet. And this is a very hygienic solution because you do not touch the next sheet of paper, thus avoiding the transfer of bacteria.

W-fold

ABENA's W-fold embraces all the same hygiene benefits as the Z-fold, but introduces you to a longer towel sheet, folded with four panels.

When choosing a W-fold, you get an extra sheet in your hand which, in most cases, allows you to only need one hygiene paper for drying your hands, rather than two or three. This extra-long folding therefore has a visibly reducing effect on your paper consumption – especially in cases where you use our ABENA Care-Ness Excellent, which is made from 100% new fibres and has extra-ordinarily good absorbency.





V-fold

Our V-fold is a good economical solution, giving you one hygiene paper at a time, just like the W- and Z-folds.

When you pull a paper sheet from the dispenser, then part of the next sheet of paper will follow. With the V-fold you only draw one sheet of paper at a time while avoiding contact with the next sheet.

V-fold consists of two panels and is deeper than Z-fold and W-fold.

C-fold

For hygiene and consumption reasons, we do not recommend using a C-fold in a wall-hung dispenser, since this folding does not help the next piece of paper out of the dispenser.

This means that you will need to put your hand into the dispenser to pull out the next sheet. This action may result in physical contact with a piece of paper you do not need.

In addition, you risk increased consumption, as this folding does not allow a sheet-by-sheet function in dispensers, which is due to two things:

1. The sheet does not unfold when extracted, so you do not use the full length of the sheet.

2. You can easily pull too much paper from the dispenser, as the dispensing of the next sheet is not present.

ABENA Care-Ness Excellent

If you take a look at the next pages, we will show you which towel sheets and types of toilet paper can complete your Excellent expression in harmony with carefully selected dispensers and waste bins.

Here you get an insight into a unique range that complies with the high demands on hygiene paper from you guests - and where quality therefore plays a crucial role in your choice.

ABENA Care-Ness Excellent

Hand towel, ABENA Care-Ness Excellent

Item number	Color	Ingredients / Composition	Dimensions	Layer quantity	Folding method	Sheet per pk / pk per cll
114122	White	100% Cellulose	32x21.5cm	2 layers	W-fold	125 / 25

This hand towel is the hygienic alternative to fabric towels and hot air dryers. The product is made from 100% Cellulose, which combines with the smooth surface and unique embossing to provide maximum absorbency and reduce consumption. The sheets are folded with one-sheet-at-a-time function, which both reduces consumption and improves hygiene.

Hand towel roll, ABENA Care-Ness Excellent

Item number	Color	Ingredients / Composition	Dimensions	Layer quantity	Roll per cll / cll per pll
6135	White	100% Cellulose	100m x 20.3cm, Ø19cm	3 layers	6 / 32
110039	White	100% Cellulose	140m x 20.3cm, Ø19cm	2 layers	6 / 32

Dispenser, Classic Recycled

Item number	Color	Dimensions	Material	Features	Pcs per cll / cll per pll
1999902757	White	20x30x34cm, Ø35cm	Plastic	Hand towel roll	1 / 36
1999902633	Black	20x30x34cm, Ø35cm	Plastic	Hand towel roll	1 / 36

The dispenser is made of 100% recycled plastic, and has a strong and long-lasting quality. Stylish design with smooth edges for an inviting experience. The tear-off edge of the dispenser is designed so that the user does not cut his or her hands when pulling out the paper. The dispenser is designed so that service staff can easily keep an eye on how much has been used without opening it.

Hand towel, ABENA Care-Ness Excellent

Item number	Color	Ingredients / Composition	Dimensions	Layer quantity	Folding method	Sheet per pk / pk per cll
1000005297	White	100% Cellulose	32x20.5cm	3 layers	W-fold	125 / 25

This hand towel is the hygienic alternative to fabric towels and hot air dryers. The product is made from 100% Cellulose, which combines with the smooth surface and unique embossing to provide maximum absorbency and reduce consumption. The sheets are folded with one-sheet-at-a-time function, which both reduces consumption and improves hygiene.

ABENA Care-Ness Excellent

Hand towel, ABENA Care-Ness Excellent

Item number	Color	Ingredients / Composition	Dimensions	Layer quantity	Folding method	Sheet per pk / pk per cll
114012	White	100% Cellulose	24x20.6cm	3 layers	Z-fold	125 / 25
114014	White	100% Cellulose	24x20.6cm	2 layers	Z-fold	160 / 25

This hand towel is the hygienic alternative to fabric towels and hot air dryers. The product is made from 100% Cellulose, which combines with the smooth surface and unique embossing to provide maximum absorbency and reduce consumption. The sheets are folded with one-sheet-at-a-time function, which both reduces consumption and improves hygiene.

Hand towel, ABENA Care-Ness Excellent Plus

Item number	Color	Ingredients / Composition	Dimensions	Layer quantity	Folding method	Sheet per pk / pk per cll
114020	White	100% Cellulose	32x20.5cm	2 layers	W-fold	100 / 20
114019	White	100% Cellulose	24x20.5cm	2 layers	Z-fold	130 / 20

The hand towel is manufactured using TAD (Through Air Dry) production technology, which means that the paper has a particularly high absorbency and is extra soft compared to ordinary paper towels. This hand towel is the hygienic alternative to fabric towels. The product is made from 100% Cellulose, which combines with the smooth surface and unique embossing to provide maximum absorbency and reduce consumption. The sheets are folded with one-sheet-at-a-time function, which both reduces consumption and improves hygiene.

Hand towel, ABENA Care-Ness Excellent

Item number	Color	Ingredients / Composition	Dimensions	Layer quantity	Folding method	Sheet per pk / pk per cll
6133	White	100% Cellulose	21x25cm	2 layers	V-fold	190 / 20

This hand towel is the hygienic alternative to fabric towels and hot air dryers. The trash can is made from recycled milk cartons with care for the environment. The material is in a robust and timeless design, and the trash can be hung on the wall, and has a top that hides the bag.

Paper towel sheets ensure your hygiene and are easy to dispose of

From childhood, we have learned how important it is to wash our hands correctly with warm water and soap – and most importantly, for 20 to 30 seconds per wash.

However, studies prove that it also matters how we dry our hands and reduce the spread of bacteria.

It is a fact that bacteria spread easier via wet skin than dry skin. Once you have washed your hands, a proper wiping plays an essential role and has great importance for your hand hygiene.

Paper towel sheets remove most bacteria from your hands when carefully wiping your hands with the paper. Far more bacteria survive on your washed hands when you dry them under a hot air dryer or in a jet air dryer.

If we compare air dryers and cloth towels with paper towel sheets, there are two more decisive advantages to choosing paper:

1. When you use an air dryer to dry your hands, the number of bacteria in the air increases, while the use of paper sheets reduces bacteria in the air.[1]
2. When you dry your hands in paper towel sheets rather than in a fabric solution, you remove the entire environmentally damaging joint, which includes:

- Collection of used cloth towels.
- Consumption of water and energy to wash the used cloth towels.
- Energy for drying the cloth towels.
- Packing the clean cloth towels.
- Transportation of clean cloth towels back to you by truck.

1. Redway K., Fawder S. 2008. A comparative study of three different hand drying methods: paper towel, warm air dryer, jet air dryer. University of Westminster. Pages 18 - 25.

Invest in good hand hygiene and stop routes of transmission

Proper hand hygiene is one of the most important steps to preventing the spread of infections between people. Bacteria and viruses from contaminated surfaces such as door handles, sinks, toilet boards, kitchen tables, smartphones and other screens can be transferred to your hands after direct contact.

If you scratch your eye or touch your mouth with a finger, the bacteria or viruses may cause illness.

According to WHO, it has been proven that good hand hygiene reduces infection. Furthermore, poor hand hygiene is considered to be the main cause of the spread of multi-resistant bacteria, just as it is a cause of outbreaks of infection.[2]

Therefore, always wash hands before meals, food handling and after toilet visits. And if you do not have the option to wash your hands with water and soap, a hand sanitizer is a good alternative.

2. WHO, 2006. WHO guidelines on hand hygiene in health care (advanced draft). Page 83.

Guides

How to wash your hands correctly

Rinse your hands and wrists thoroughly under running water.

If possible, use your elbow or forearm when taking soap from a manual dispenser.

Spread the soap thoroughly and wash your hands for at least 20-30 seconds.

Rub the soap well between your fingers.

Remember your thumbs, palm, back and wrists.

Rinse off the soap residues well to avoid skin irritation.

Now wipe your hands thoroughly with a hygiene paper.

Close the faucet with the used paper towel.

How to disinfect your hands correctly with alcohol-based disinfectant

Use hand sanitizer when your hands feel dry and are not visibly dirty.

Use a blob of hand sanitizer (equivalent to 3 ml).

Distribute it and rub it thoroughly on all surfaces of both hands, between your fingers and wrists for at least 30 seconds.

The hand sanitizer should be rubbed in until it feels dry.

Use hand sanitizer and disinfect your hands:

- Before clean tasks.
- After unclean tasks.
- After use and change of gloves and other protective equipment.

ABENA Care-Ness Classic

Let us show you the full product range for your washroom facilities, which consists of our Classic paper range with associated dispensers and waste bins.

If you choose Abena Care-Ness Classic, you get a white paper with a good absorbency, which feels soft and comfortable. And you get a paper range made of mixed fibres or recycled paper in a very high quality.

ABENA Care-Ness Classic

Hand towel

Item number	Color	Ingredients / Composition	Dimensions	Layer quantity	Folding method	Sheet per pk / pk per cll
114115	White	Mixed fibers	24x20cm	2 layers	Z-fold	210 / 21

This hand towel is the hygienic alternative to fabric towels and hot air dryers.
