

Product Main Number 1000025894

Cleaning trolley, Vikan HyGo, 780mm, white, Assembled

- ✓ HyGo mobile cleaning station
- ✓ 360 degree wheels

Product Description

Vikan's HyGo is the first mobile cleaning station for the food and beverage industry that combines hygiene, efficiency and manoeuvrability in a purpose-built solution. In addition to more efficient cleaning, HyGo also solves problems with limited space, lost equipment and time wasted. The HyGo has a narrow frame and 360-degree wheels, so it's easy to navigate through doorways and other narrow spaces. The modules and hangers for props can be adapted as your needs change. The hangers can accommodate up to five props as standard. It is possible to purchase additional hangers, so the HyGo can accommodate up to 12 mounted props. The two rear wheels can be locked. The upper tray can carry up to 12 kg, and the lower tray can carry up to 20 kg. HyGo can be disassembled and the individual parts can be cleaned without water or cleaned with water. We recommend retightening bolts on baskets and wheels every 6 months to ensure that HyGo has good stability.

Specifications

Base name	Cleaning trolley
Brand	Vikan
Sub-Brand	HyGo
Color	White
Features	Assembled
Length/depth	780 mm
